PROFILE

DevOps Engineer with 3+ years of experience building scalable CI/CD platforms and Kubernetes-based systems on AWS (EKS) and Azure DevOps. Migrated legacy applications to Kubernetes, reducing infrastructure costs by ~40% and improving deployment reliability.

Designed and managed 100+ CI/CD pipelines and implemented GitOps (Argo CD), enabling faster, consistent, and automated releases. Strong expertise in Kubernetes, Terraform, and automation (PowerShell/Python), with a focus on eliminating manual effort, improving system visibility (Datadog), and delivering production-grade, cost-efficient solutions.

SKILLS

Containerization & Orchestration:

Docker, Kubernetes (EKS), Argo CD (GitOps), Helm

Cloud Platforms:

AWS, Azure DevOps

Scripting & Programming:

PowerShell, Python, Bash

Monitoring & Logging:

Datadog

CI/CD & Automation:

Azure DevOps, GitLab CI/CD, Jenkins, CI/CD design and optimization

Infrastructure as Code:

Terraform

Version Control:

Git (Azure Repos, GitLab)

PROFESSIONAL EXPERIENCE

DevOps Engineer

Koch Business Solutions India Pvt. Ltd.

09/2024 – Present | Bengaluru, Karnataka

- Migrated multiple internal applications from ELB-based deployments to Kubernetes (AWS EKS), improving scalability and reducing infrastructure cost by ~40%.
- Designed and implemented end-to-end CI/CD pipelines for containerized applications, including Docker image build, registry management (GitLab), and automated Kubernetes deployments.
- Developed and maintained Kubernetes manifests (Deployments, Services, ConfigMaps, Secrets, ingress/load balancing) to support production-grade deployments.
- Implemented GitOps-based deployment strategy using Argo CD, enabling automated, version-controlled, and reliable Kubernetes releases.
- Automated container image updates within CI/CD pipelines by dynamically updating Kubernetes manifests, ensuring seamless rollouts.
- Integrated Datadog for monitoring and observability, creating dashboards to improve system visibility and reduce troubleshooting time.
- Built and managed 100+ CI/CD pipelines in Azure DevOps for MuleSoft deployments, reducing manual intervention.
- Developed a centralized repository for reusable PowerShell scripts, enabling code reuse and faster updates across all pipelines.
- Designed a centralized CI/CD pipeline template repository with standardized Maven configurations and reusable YAML components, reducing platform-wide CI failures.
- Replaced AutoRABIT-based Salesforce deployments with Azure DevOps pipelines, eliminating ~\$100K in licensing costs.
- Automated Datadog agent installation across 100+ EC2 instances using PowerShell, reducing setup from 3 days to ~1 hour.
- Built a MuleSoft schedule monitoring solution with hourly Azure Pipelines runs and Teams notifications, reducing P1 incidents.
- Automated UAT environment refresh using PowerShell and Azure DevOps, reducing execution time from ~5 hours to 30 minutes.

- Automated Teamcenter deployment using PowerShell, Bash, and Azure DevOps, reducing deployment time from ~10 hours to 3 hours per cycle and saving ~6 hours monthly.
- Managed and supported 5 legacy applications across dev, test, and production environments on AWS (EC2, S3, RDS), ensuring stable and reliable releases.
- Investigated and resolved incidents related to legacy systems, reducing downtime and improving system stability.
- Built and managed CI/CD pipelines in Azure DevOps for legacy application deployments, improving deployment consistency and reducing manual intervention.
- Automated routine operational tasks using PowerShell and Python, reducing manual effort across deployment workflows.
- Collaborated with development and infrastructure teams to streamline release processes and drive DevOps adoption.

- Assisted in application deployment and support across different environments, ensuring smooth functionality.
- Supported the development and maintenance of CI/CD pipelines using Azure DevOps.
- Gained hands-on experience with AWS during application migration activities.
- Monitored application performance and helped identify and troubleshoot issues.
- Collaborated with team members to resolve incidents and improve deployment processes.
- Automated basic operational tasks using PowerShell/Python scripts to reduce manual effort.
- Learned and followed best practices for application lifecycle management and release processes.

EDUCATION

Master of Computer Applications <i>R V College of Engineering, Bengaluru, Karnataka</i>	2021 – 2023
Bachelor of Computer Application <i>University of Mysore, Hassan, Karnataka</i>	2018 – 2021
Pre University - PCMCs <i>HKS PU College, Hassan, Karnataka</i>	2016 – 2018
SSLC <i>Hassan Public School, Hassan, Karnataka</i>	2015 – 2016
